

MAQUINARIA VIBRANTE

VIBRATING MACHINERY

ERALKI
ENGINEERING SL

WHO ARE WE?

Eralki Engineering S.L. is a engineering company dedicated to provide **customized solutions** through the design and manufacture of **vibrating machinery** applied to transport, dosing, screening and material handling in general.

Eralki is formed by a team of individuals with extensive experience and knowledge in the world of vibration, enabling us to offer our customers:

- The **best solution** for your needs
- with **personal attention**,
- and the **highest quality** in both services: product and after-sales.

We have the technology and, especially, the best human resources to carry out our projects, ensuring the best conditions in the finishing equipment. Our production system is implemented with the **highest quality controls** to ensure perfect operation under required working conditions.

Do not hesitate to contacting us about any new project you want or need to study so we can solve it through vibration.

YOUR STRATEGIC PARTNER IN VIBRATION

Iron and steel sector

Aggregates and mining sector

Recycling and waste sector

ACTIVITY SECTORS

The sectors or industries in which **Eralki Engineering SL** is present are very diverse, as our equipments are present in **all industrial processes** where is required to handle any type of bulk solids.

Typical fields of applications are food, chemical, ceramics, quarries, foundries, recycling of materials, steel, mining, biomass, glass, etc ..

RANGE OF EQUIPMENT

LOW FLOW DOSING

FEEDERS

CONVEYORS

SCREENS

SCREENS MULTI-TYPE

SCREENS FLIP-FLOW
